PROFILE

Customer experience and support operations leader with 13+ years in SaaS and the WordPress ecosystem. Proven track record of improving customer experience, scaling support operations and driving measurable business outcomes. Specialised in support transformation: Zendesk migrations, AI-driven support optimisation, workflow automation and cross-functional service design, using AI to give teams more time for the conversations that need a person.

13+ years
in SaaS and support leadership

90% → 94%
CSAT at WP Media

~24h → hours
first response time

~30%
fewer Imagify tickets through AI automation

EXPERIENCE

WP Media WP Rocket · Imagify · RocketCDN — Mar 2023 – present

Customer Experience & Quality Lead CURRENT — Jan 2026 – present

Promoted as the customer experience function evolved, expanding from support operations into end-to-end customer experience and quality strategy across WP Media products. Responsible for support operations, CX strategy, quality systems, workflow design, AI-driven support optimisation, reporting, and alignment with Product, Engineering and Marketing.

Head of Support — Mar 2023 – Jan 2026

- Led the migration from Help Scout (8 mailboxes) to Zendesk, building a scalable support operations system across multiple products and teams.
- Reduced first response time from ~24 hours to a few hours through workflow redesign, prioritisation logic and operational improvements.
- Increased CSAT from 90% to 94% through structured quality programmes and support process improvements.
- Reduced Imagify ticket volume by ~30% through AI-powered automation and improved self-service flows.
- Designed and implemented 100+ standardised support workflows, improving consistency and efficiency across teams.
- Established structured escalation processes across Support, Product and Engineering, improving resolution speed and alignment.
- Introduced support tiering frameworks that reduced unnecessary escalations and improved operational clarity.
- Built RocketCare, a premium installation and onboarding service, improving onboarding and support monetisation.
- Led and developed a team of ~18 support professionals through operational leadership, coaching frameworks and quality systems.

WPMU DEV

Jun 2013 – Mar 2023

Head of Sales & Accounts

Jul 2017 – Mar 2023

- Led global accounts and customer operations across a distributed SaaS organisation.
- Owned onboarding, retention, account management and customer success workflows across key segments.
- Improved operational scalability by designing reporting systems and customer lifecycle processes.

Support Team Lead

May 2015 – Jul 2017

- Led a support team responsible for customer issue resolution, onboarding and product guidance.
- Implemented coaching, training and performance frameworks to improve team consistency and output quality.

Accounts Support Specialist

Jun 2013 – May 2015

- Managed customer accounts, billing issues and retention-related enquiries.
- Supported customer onboarding and account lifecycle processes.

APPROACH TO AI

People stay in charge. I use AI to automate the repetitive, never the relationship, with privacy by default and results measured before they are trusted.
