Professional Summary

Customer Experience and Support Operations leader with 13+ years of experience in SaaS and the WordPress ecosystem. Proven track record of improving customer experience, scaling support operations, and driving measurable business outcomes across SaaS products.

Specialized in support transformation, including Zendesk migrations, AI-driven support optimization, workflow automation, and cross-functional service design. Known for reducing support friction, improving response efficiency, and building scalable systems that improve CSAT, operational cost, and team performance.

Core Competencies

Customer Experience Strategy • Support Operations Leadership • Zendesk Administration • Help Scout Administration • AI-Powered Support Automation • Process & Workflow Design • Knowledge Management Systems • Service Design • Customer Journey Optimization • Support Analytics & Reporting • Escalation Management • Cross-Functional Leadership • Documentation Strategy • Operational Scaling

Professional Experience

WP Media (WP Rocket, Imagify, RocketCDN)

Customer Experience & Quality Lead (Jan 2026 – Present)

Head of Support (Mar 2023 – Jan 2026)

Promoted as part of the evolution of the customer experience function, expanding responsibility from support operations into end-to-end customer experience and quality strategy across WP Media products.

Responsible for support operations, customer experience strategy, quality systems, workflow design, AI-driven support optimization, reporting, and cross-functional alignment across Product, Engineering, and Marketing.

Key Impact & Achievements

- Led migration from Help Scout (8 mailboxes) to Zendesk, building a scalable support operations system across multiple products and teams.
 - Reduced First Response Time from ~24 hours to a few hours through workflow redesign, prioritization logic, and operational improvements.
 - Increased CSAT from 90% → 94% through structured quality programs and support process improvements.
 - Reduced Imagify ticket volume by ~30% through AI-powered automation and improved self-service flows.
 - Designed and implemented 100+ standardized support workflows, improving consistency and operational efficiency across teams.
 - Established structured escalation processes across Support, Product, and Engineering, improving resolution speed and cross-team alignment.
 - Introduced support tiering frameworks that reduced unnecessary escalations and improved operational clarity across the organization.
 - Built RocketCare, a premium support service for installation and onboarding, improving customer onboarding experience and support monetization.
 - Identified key friction points in the customer journey and drove documentation and self-service improvements to reduce inbound support load.
 - Led and supported a team of ~18 support professionals through operational leadership, coaching frameworks, and quality systems.
-

WPMU DEV

Head of Sales & Accounts (Jul 2017 – Mar 2023)

- Led global accounts and customer operations across a distributed SaaS organization.
- Owned onboarding, retention, account management, and customer success workflows across key segments.
- Improved operational scalability by designing reporting systems and customer lifecycle processes.
- Partnered with support and product teams to improve customer retention and satisfaction outcomes.

Support Team Lead (May 2015 – Jul 2017)

- Led a support team responsible for customer issue resolution, onboarding, and product guidance.

- Implemented coaching, training, and performance frameworks to improve team consistency and output quality.
- Collaborated with leadership to improve support workflows and reduce resolution friction.

Accounts Support Specialist (Jun 2013 – May 2015)

- Managed customer accounts, billing issues, and retention-related inquiries.
 - Supported customer onboarding and account lifecycle processes.
 - Contributed to early-stage improvements in support and account workflows.
-
